General Information

- Online Food Ordering System is a tool which is used by small, medium, and large coffee or café shops to provide services such as delivery, online order and billings.
- It is also designed to provide better and quick services to the customers.
- This system helps to save your time and attract the new and existing customers.

Objective

- Remove the human error as well as miscalculations.
 - Remove the Paper based record keeping.
 - Easy to use for both Customer(ordering) as well as Café Administrator (visible flow of data).
 - Also, will be helpful in regard to the Marketing, since everyone these days do have internet access on their fingertips.
 - Trustworthy delivery system for the customers as it uses its own delivery system.
- 

Scope

- Easier system to use for any age group.
- Easy select and order with simplicity.
- No use of third party application for delivering.
- Reliable for customers since, we are owning our own ordering as well as delivery system.
- Many methods for payment (Cash on Delivery, E-sewa, Khalti).

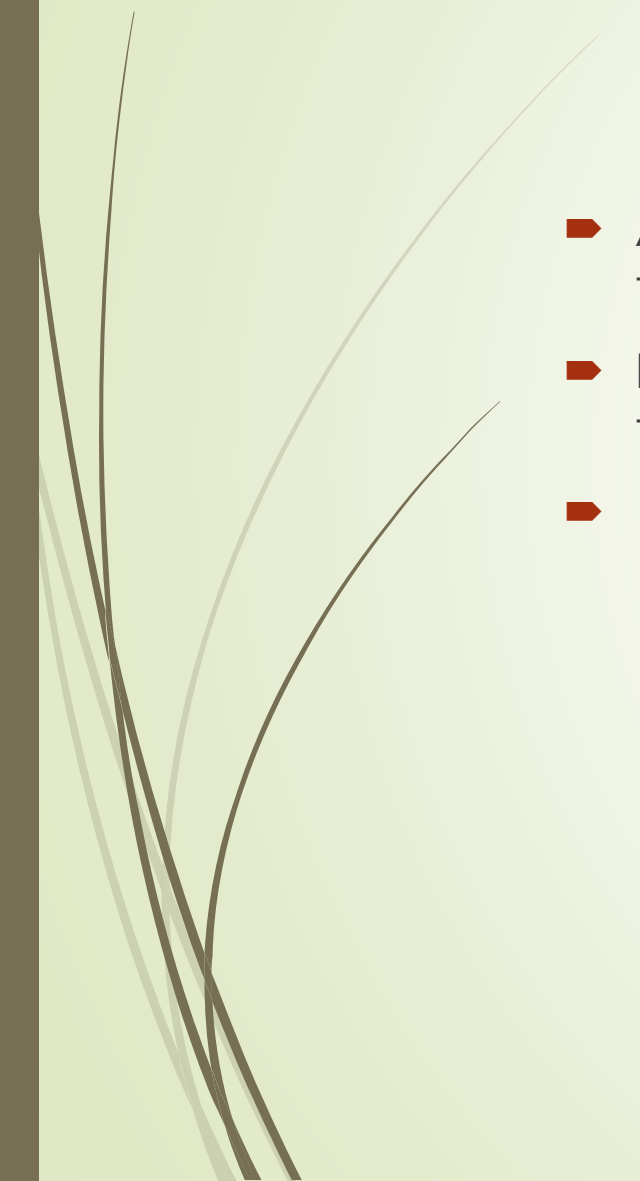

Limitation

- Tracking of food delivery is not available.
- This system can not specify the time consumed during delivery.
- User cannot update or edit profile.
- User cannot change password.
- Food category is not made yet.

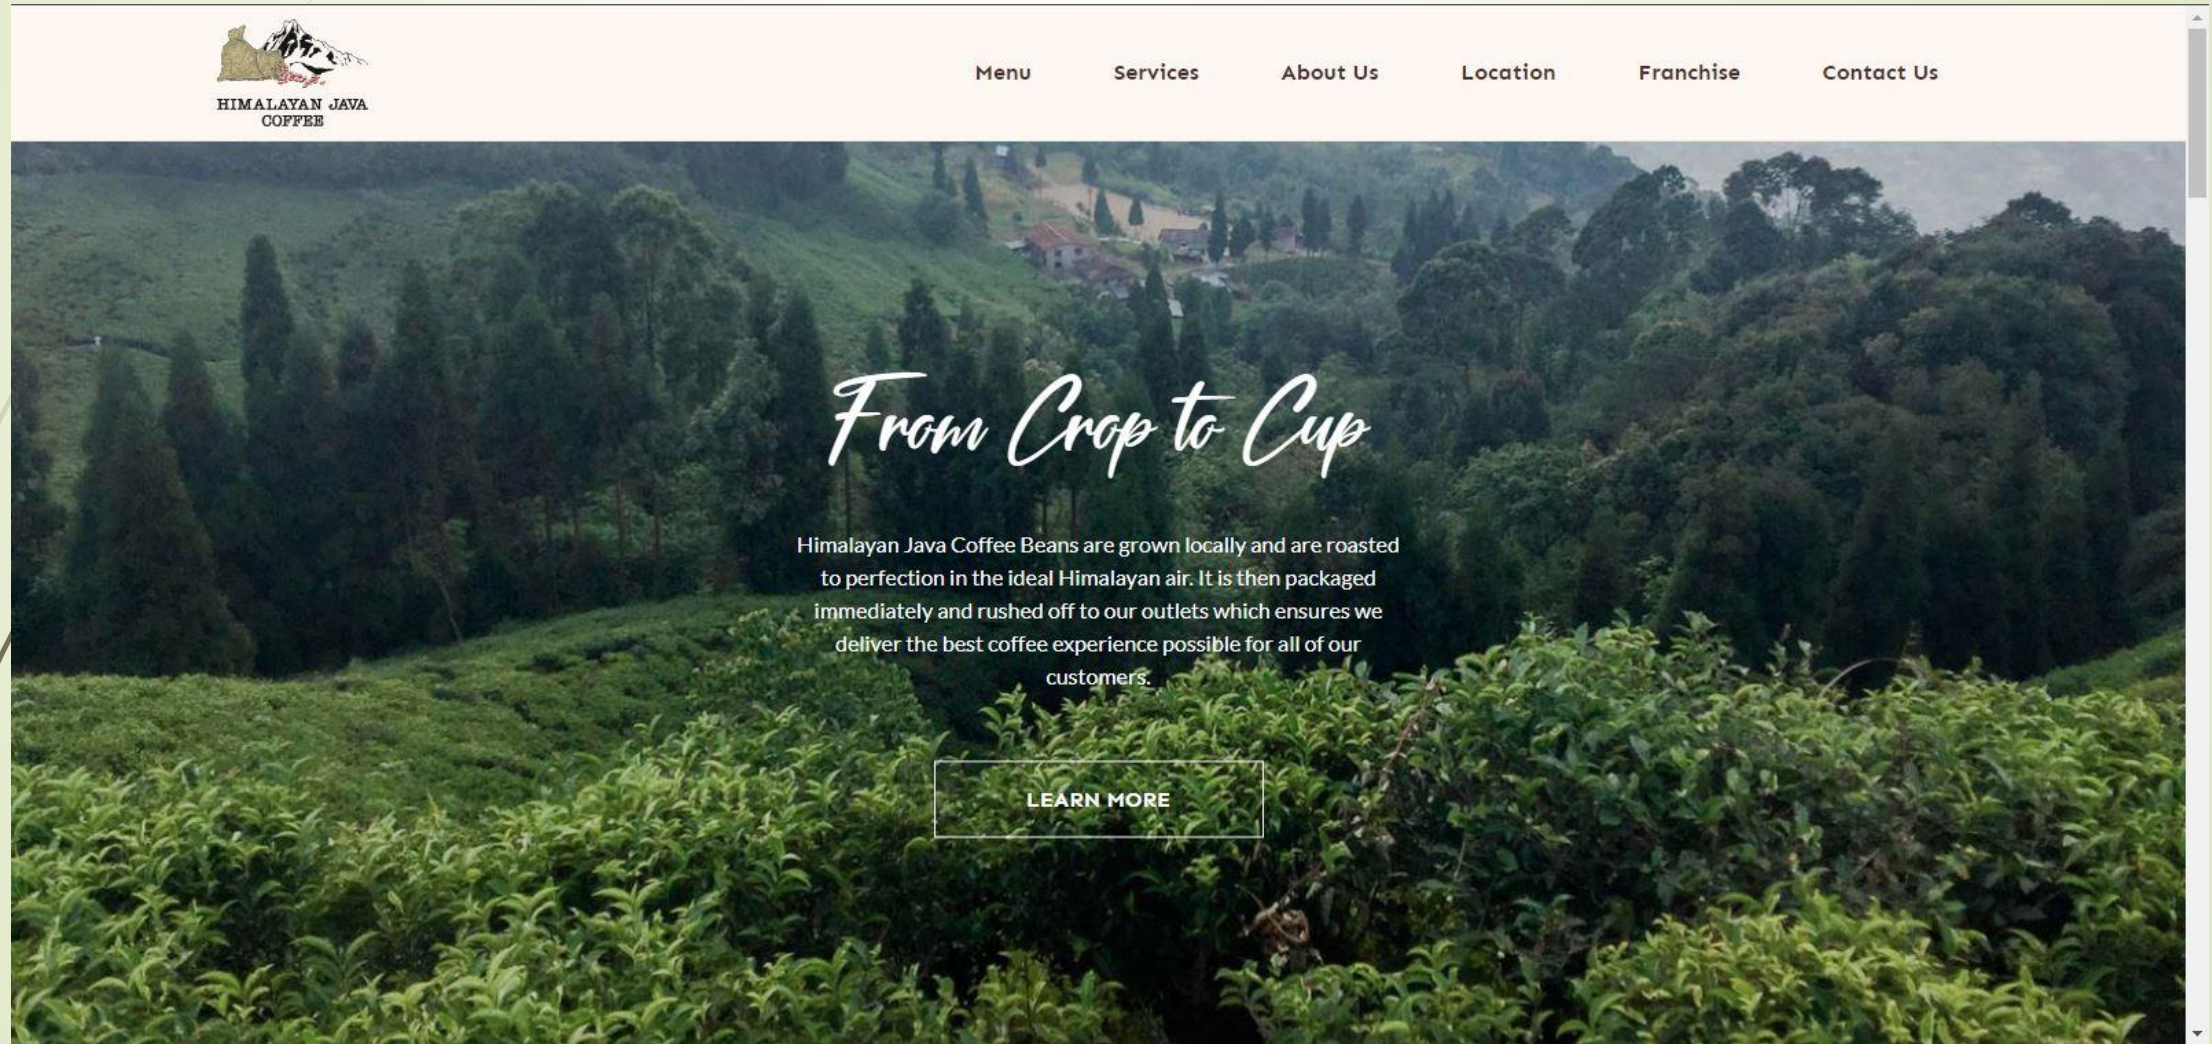

Literature Review

- Although there are lots of third-party delivery system, it is much more viable to have own ordering as well as delivery system for the customers.
- For this cafe customers satisfaction is the prior thing, that's the reason why this cafe owner came up with an idea of developing its own system.
- It also protects the customers information being handed to third-party.

Himalayan Java About page

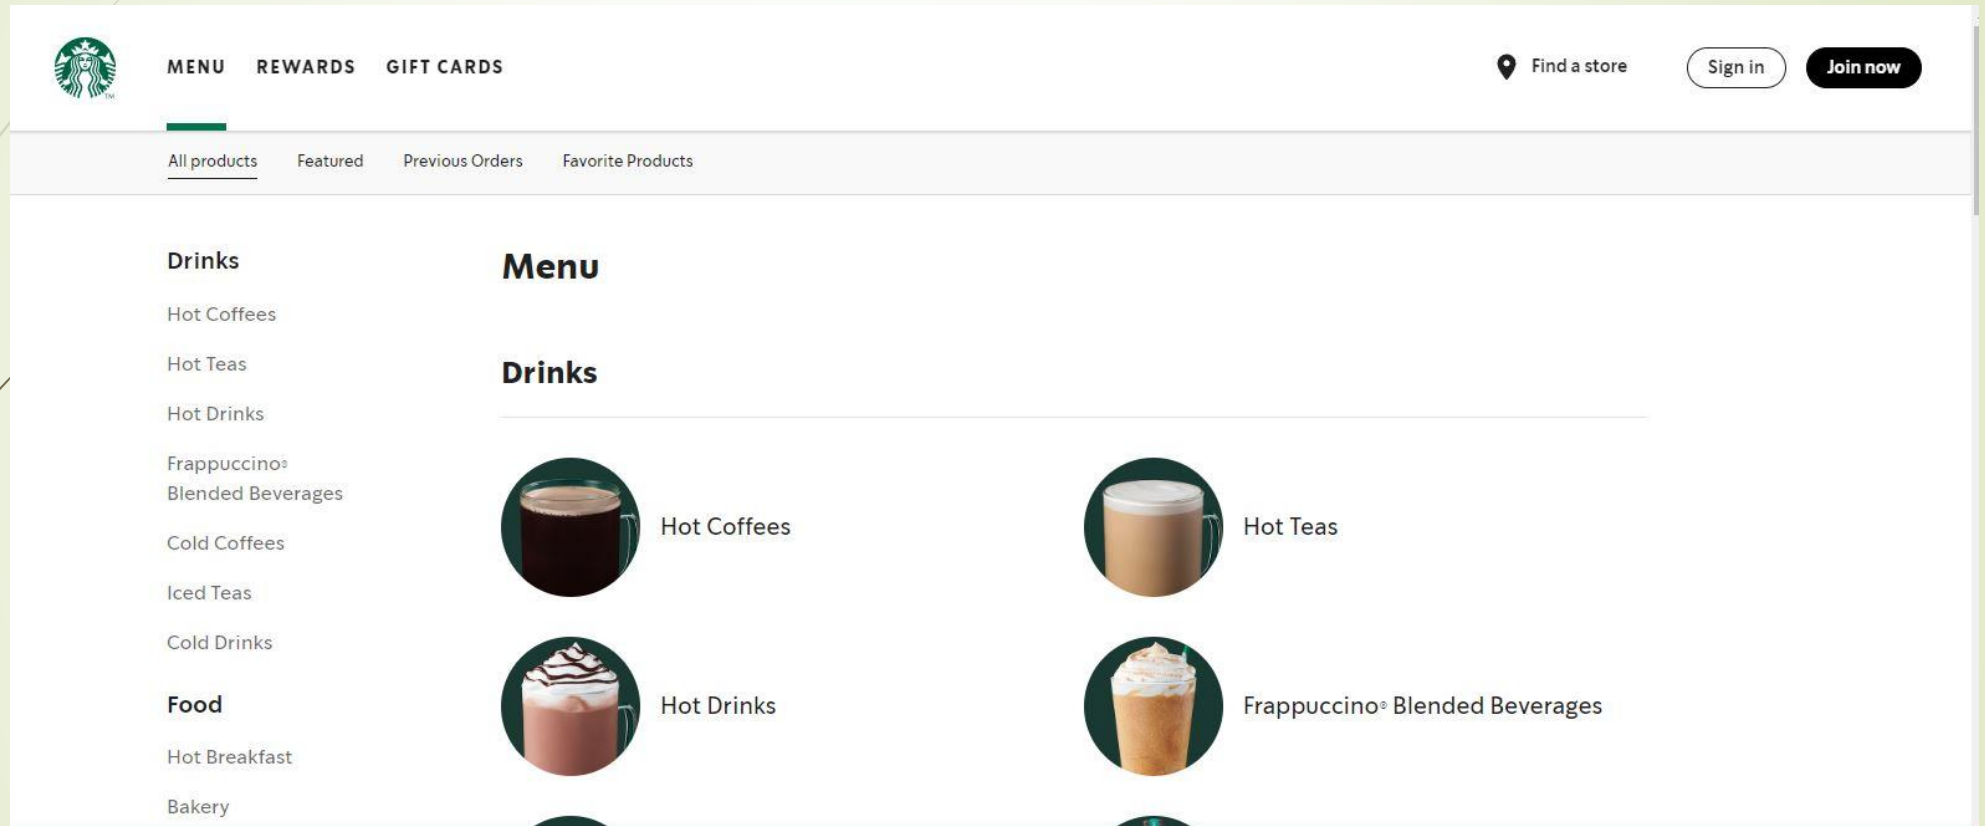

About Us

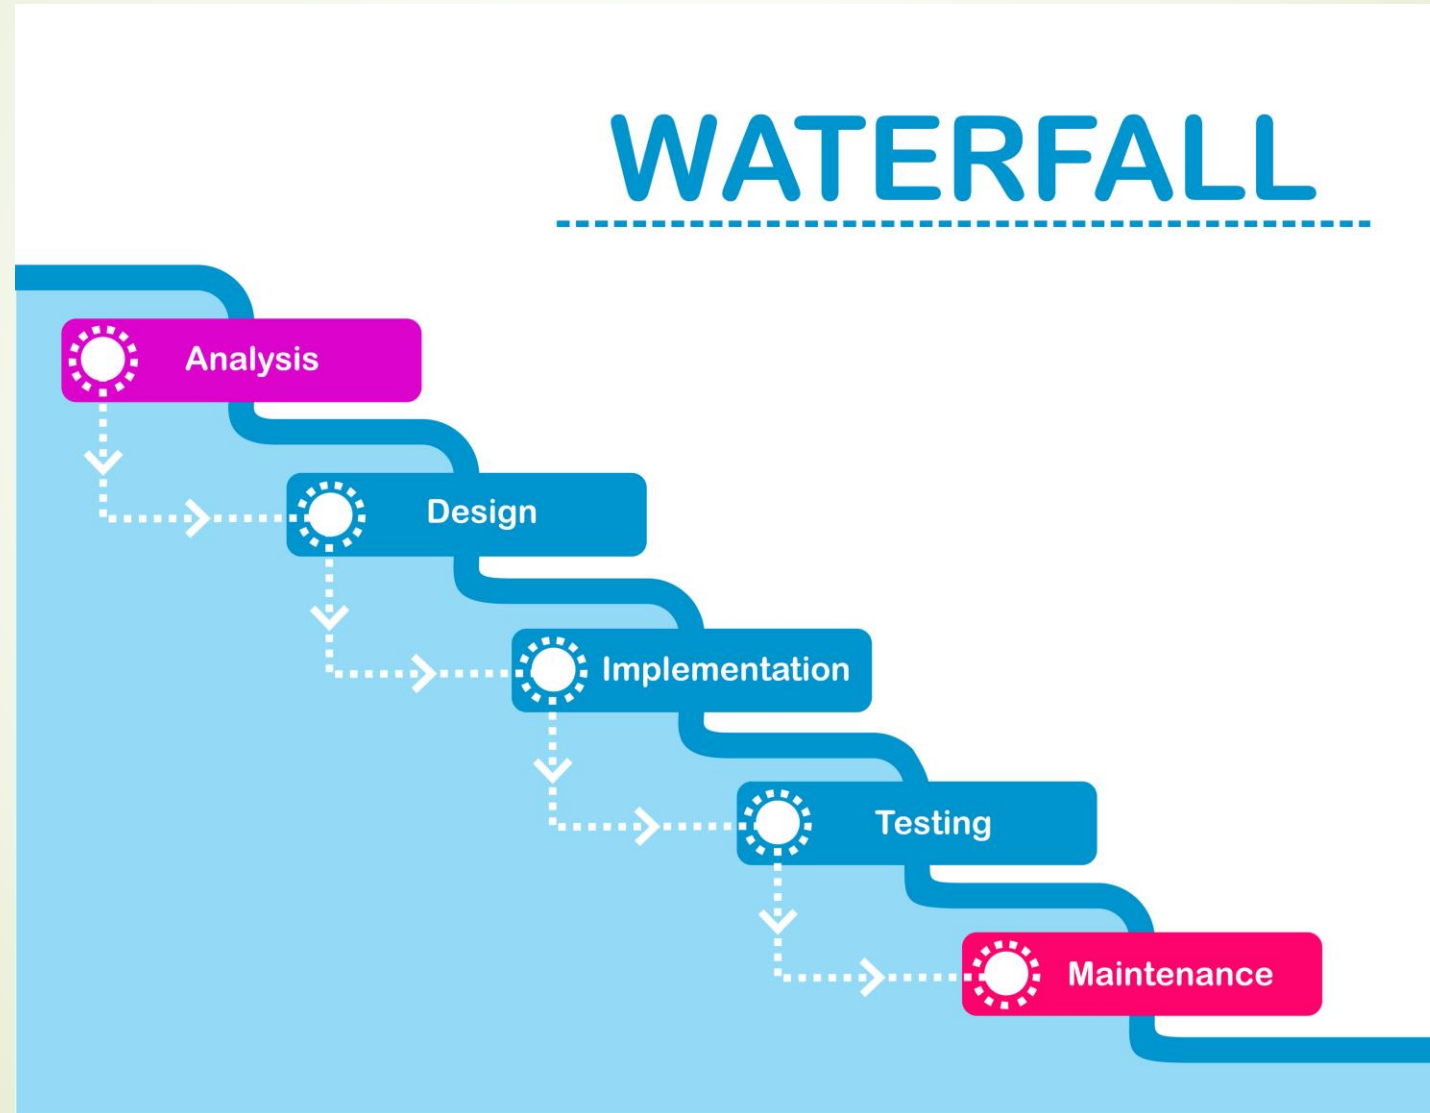

In 1999, we started off as the first specialty coffee shop in Nepal to specialize in handcrafted coffee and bakery. Over the years, we have diversified from a small coffee shop to an international franchising Nepalese Coffee Brand with more than 30 outlets around the world.

We believe in maintaining a sustainable business ecosystem by supporting local farmers and Nepali products. Through continuous innovation in technology & process, we hope to become the most inspiring Nepalese Coffee Establishment in the world taking Nepalese Coffee and Culture to the world.
